

ATHWAX

CONSULTANTS LIMITED

Engineering Consultancy Services for Infrastructure and the Built Environment

Structures that inspire ...

...roads that unite.

Corporate Brochure • 2026

ABOUT US

Athwax Consultants Limited is a Ugandan engineering consultancy firm established in January 2020, specialising in transportation infrastructure, buildings, and construction supervision services across urban and municipal development projects in Uganda.

The firm delivers consultancy services across the full project cycle, including feasibility studies, design, construction supervision, and project management, with demonstrated experience in municipal infrastructure and building development projects.

The firm's core operations are based locally, with the ability to support assignments through regional and international collaborations where required.

Athwax Consultants Limited emphasises integrity, professionalism, and adherence to quality in all services undertaken, in line with applicable national standards and internationally recognised engineering practices.

OUR SERVICES

Athwax Consultants Limited provides multidisciplinary engineering consultancy services through seven practice areas. Our teams analyse project requirements and recommend cost-effective, technically sound solutions without compromising on quality.

- **Transportation Engineering**
Geometric design, traffic studies, and urban road infrastructure planning, including coordination with pavement design inputs and drainage systems.
- **Architecture & Structural Engineering**
Architectural concept development, detailed design, structural analysis, and supervision of commercial, residential, and institutional developments.
- **Geotechnical Engineering**
Subsurface investigations, soil classification in accordance with recognised standards, foundation design recommendations, and slope stability assessments.
- **Water Resources & Hydraulic Engineering**
Water supply systems, stormwater drainage design, hydrological analysis, and reticulation systems for urban and rural infrastructure.

- **Environmental Engineering**
Environmental and social impact assessments, compliance support, and coordination of monitoring programmes.
- **Construction Engineering & Management**
Construction supervision and contract administration, including quality assurance, programme monitoring, measurement, and certification of works.
- **Surveying & Geomatics**
Topographic surveys, setting-out, control network establishment, and GIS mapping in support of design and construction activities.

Athwax Consultants Limited provides multidisciplinary services within Uganda and participates in regional assignments through strategic partnerships with established firms across East and Southern Africa.

STAFF & FACILITIES

Team

The firm operates with a core team of permanent staff supported by a network of project-based specialists, enabling flexibility in scaling resources to match project requirements.

Our team composition aligns with the firm's core practice areas, ensuring appropriate technical input across all assignments. Professionals include engineers in civil, structural, geotechnical, and transportation disciplines, supported by project managers, surveyors, and technical staff.

Athwax maintains strong relationships with national and international organisations, research institutions, and specialist consultants, facilitating access to additional expertise and resources when project scope demands it.

Facilities & Software

Athwax utilises industry-standard engineering software, including CAD, BIM (Building Information Modelling), and GIS tools across its project work. The firm engages accredited laboratories for geotechnical and environmental testing where required.

These tools support design development, documentation, analysis, and coordination across all project stages.

The firm maintains appropriate data management systems to ensure the confidentiality and integrity of project information throughout the project lifecycle.

VALUES

Athwax Consultants Limited is guided by five core values that shape how we engage with clients, partners, and the communities in which we work:

Integrity

We conduct all assignments with honesty, transparency, and ethical rigour.

Professionalism

We maintain high technical and behavioural standards across all engagements.

Accountability

We take responsibility for the quality, timeliness, and outcomes of our work.

Collaboration

We build productive relationships with clients, partners, and contractors to achieve shared project goals.

Technical Excellence

We apply current engineering knowledge, sound judgement, and thorough analysis to every assignment.

These values are embedded in the firm's quality management practices and guide decision-making and professional conduct across all engagements.

INDEPENDENCE & ETHICS

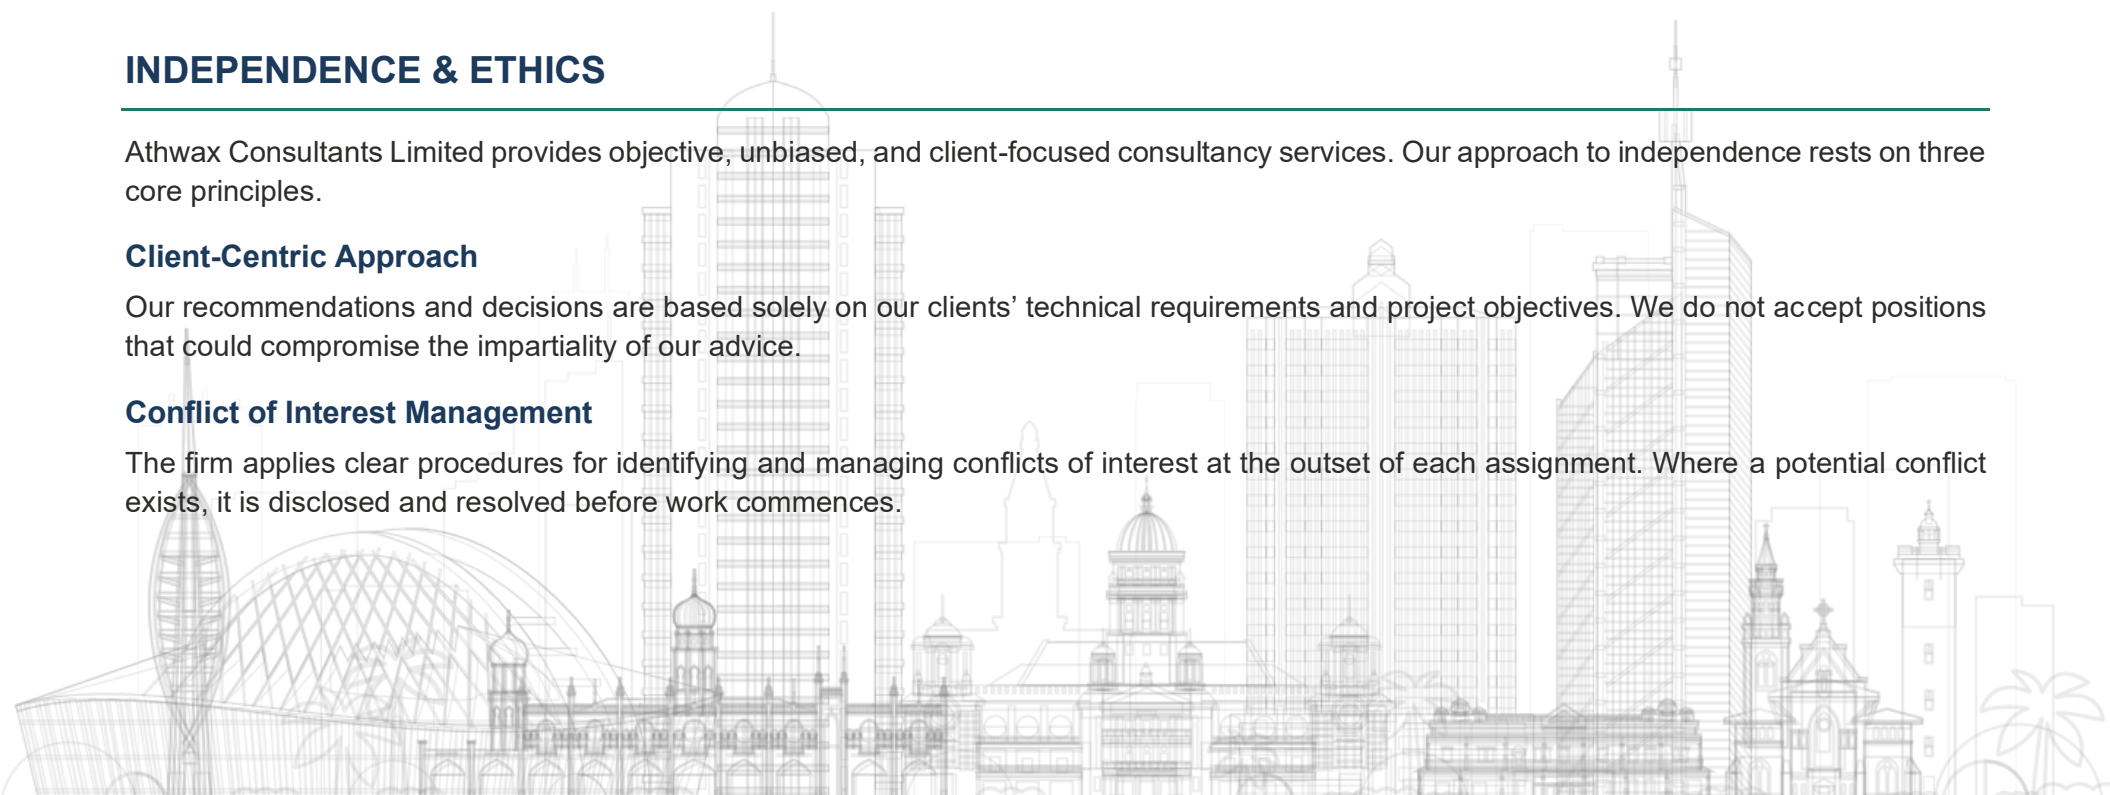

Athwax Consultants Limited provides objective, unbiased, and client-focused consultancy services. Our approach to independence rests on three core principles.

Client-Centric Approach

Our recommendations and decisions are based solely on our clients' technical requirements and project objectives. We do not accept positions that could compromise the impartiality of our advice.

Conflict of Interest Management

The firm applies clear procedures for identifying and managing conflicts of interest at the outset of each assignment. Where a potential conflict exists, it is disclosed and resolved before work commences.

Compliance with Ethical Standards

Athwax Consultants Limited adheres to the ethical codes of UIPE and UACE, supporting compliance with national engineering standards and professional practice requirements. Our consultants make recommendations based on factual evidence and professional judgement, free from external influence.

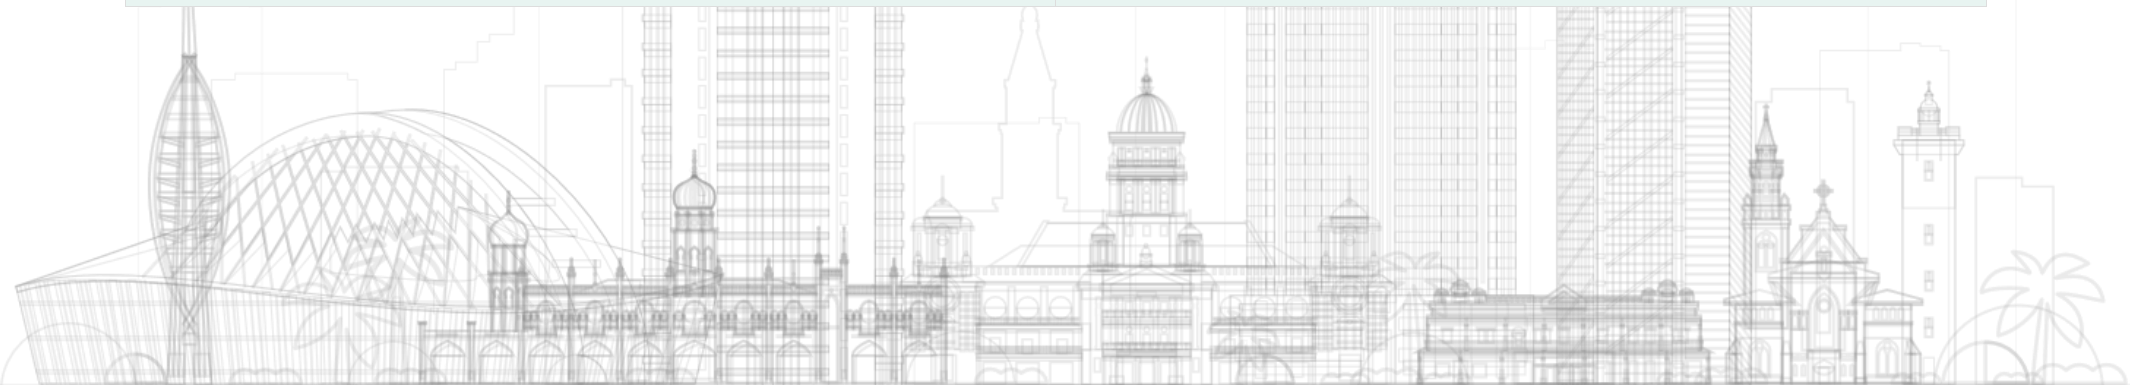

CLIENTS

Key clients include national government agencies, municipal authorities, and private sector developers. We have built long-term working relationships through our consistent professional approach and commitment to project delivery.

- Ministry of Energy and Mineral Development (MEMD)
- Ntungamo Municipal Council
- Kabale Municipal Council
- Private sector developers and property owners

CAPABILITY SNAPSHOT

Years in Practice 6+	Core Sectors Transport, Buildings, Water	Key Clients MEMD, Municipal Councils	Services Delivered Design, Supervision, PM
Projects Completed 15		Practice Areas 7 Disciplines	

OUR PROJECTS

The following table summarises completed and ongoing assignments. Athwax Consultants Limited has delivered projects spanning road design, drainage infrastructure, structural buildings, and commercial development across Uganda.

Project	Client	Scope / Key Output	Status
Community Development Centre	Ministry of Energy & Mineral Development	Architectural and engineering design, structural and construction supervision	Ongoing
Water Source Development & Reticulation System	Ministry of Energy & Mineral Development	Water supply infrastructure design and supervision	Ongoing
Wildlife Watch Tower	Ministry of Energy & Mineral Development	Structural design and construction supervision	Ongoing
Land Management Systems & Tools	Ministry of Energy & Mineral Development	GIS-based land management planning	Ongoing
Matooke Market	Ntungamo Municipal Council	Architectural and structural design	Complete
Irenga Road	Ntungamo Municipal Council	Geometric and drainage design (4.2 km)	Complete
Nkamwesiga Road	Ntungamo Municipal Council	Geometric and drainage design	Complete
Kanaahe Road	Ntungamo Municipal Council	Geometric and drainage design	Complete
Storm Water Drainage — Katuna Highway	Kabale Municipal Council	RC pipe culverts and covered drainage channels	Complete
5-Star Ankole Resort and Spa	MR & Company Advocates	Architectural, structural, and MEP design and supervision	Complete
Six-Storey Commercial Building (Active Arcade), Nakivubo Road	Seven Hills Apartments Limited	Full architectural, structural, and MEP coordination	Complete
Mitland Apartments	Palm Construction Ltd	Structural design and site supervision	Complete
4-Storey Residential Apartments, 16 Units, Bulabira Road, Najjera	Lincoln Consultsam Limited	Residential structural design and supervision	Complete

Project	Client	Scope / Key Output	Status
Apartments, Lubowa	Lincoln Consultsam Limited	Architectural and structural design	Complete
Shopping mall, Sonde-Namugongo	Lincoln Consultsam Limited	Commercial development design	Complete

Highlighted Engagements

Irenga Road, Ntungamo Municipality (4.2 km): Geometric and drainage design for a key urban road corridor, including road reserve delineation and drainage layout coordinated with the municipality’s infrastructure programme.

Storm Water Drainage, Katuna Highway, Kabale: Construction supervision of reinforced concrete pipe culverts and covered drainage channels across a high-density urban area, including Mwanjari Business Centre and Mukombe Road.

Six-Storey Commercial Building, Nakivubo Road: Full design and construction supervision of a mixed-use commercial development for Seven Hills Apartments Limited, encompassing architectural, structural, and MEP coordination across six floors.

PARTNERS & ASSOCIATIONS

Professional Associations

Athwax Consultants Limited is an active participant in Uganda's engineering professional bodies:

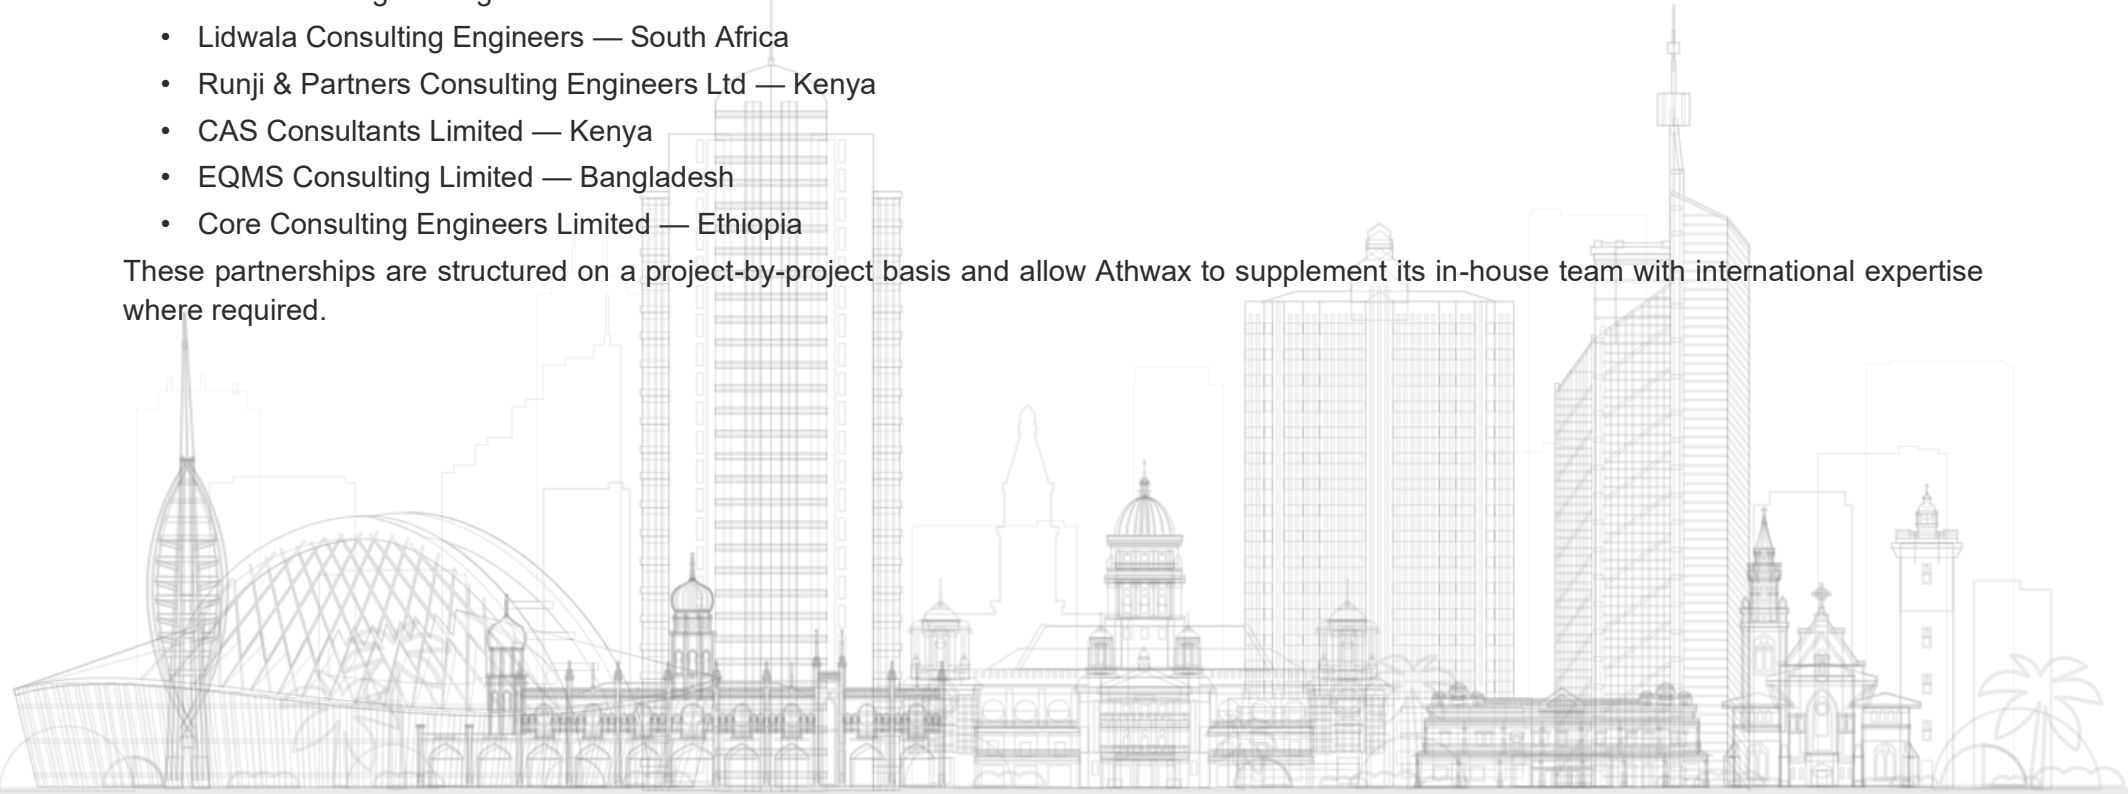

- Uganda Institution of Professional Engineers (UIPE) — the premier professional body for engineers in Uganda, supporting compliance with national engineering standards and professional practice requirements.
- Uganda Association of Consulting Engineers (UACE) — representing consulting engineers and promoting quality and innovation in engineering consultancy across Uganda.

International Associates

Athwax maintains collaboration agreements with established engineering firms in the region, enabling access to specialist expertise on projects that require it. These partnerships have supported proposal development and specialist input on multidisciplinary assignments.

- Advanced Engineering Solutions — Tanzania
- Lidwala Consulting Engineers — South Africa
- Runji & Partners Consulting Engineers Ltd — Kenya
- CAS Consultants Limited — Kenya
- EQMS Consulting Limited — Bangladesh
- Core Consulting Engineers Limited — Ethiopia

These partnerships are structured on a project-by-project basis and allow Athwax to supplement its in-house team with international expertise where required.

RESOURCES

The firm deploys targeted technical resources and structured delivery systems to execute assignments effectively. Key operational resources include:

Technical Team

A multidisciplinary team of engineers and technical professionals with demonstrated experience across Uganda's infrastructure and building sectors.

Engineering Software

CAD, BIM, GIS, and project-specific analysis tools applied across design, documentation, and supervision assignments.

Project Management

Structured project management approaches aligned with standard industry practices for planning, monitoring, and reporting, ensuring deliverables are produced on time and to the required standard.

Professional Network

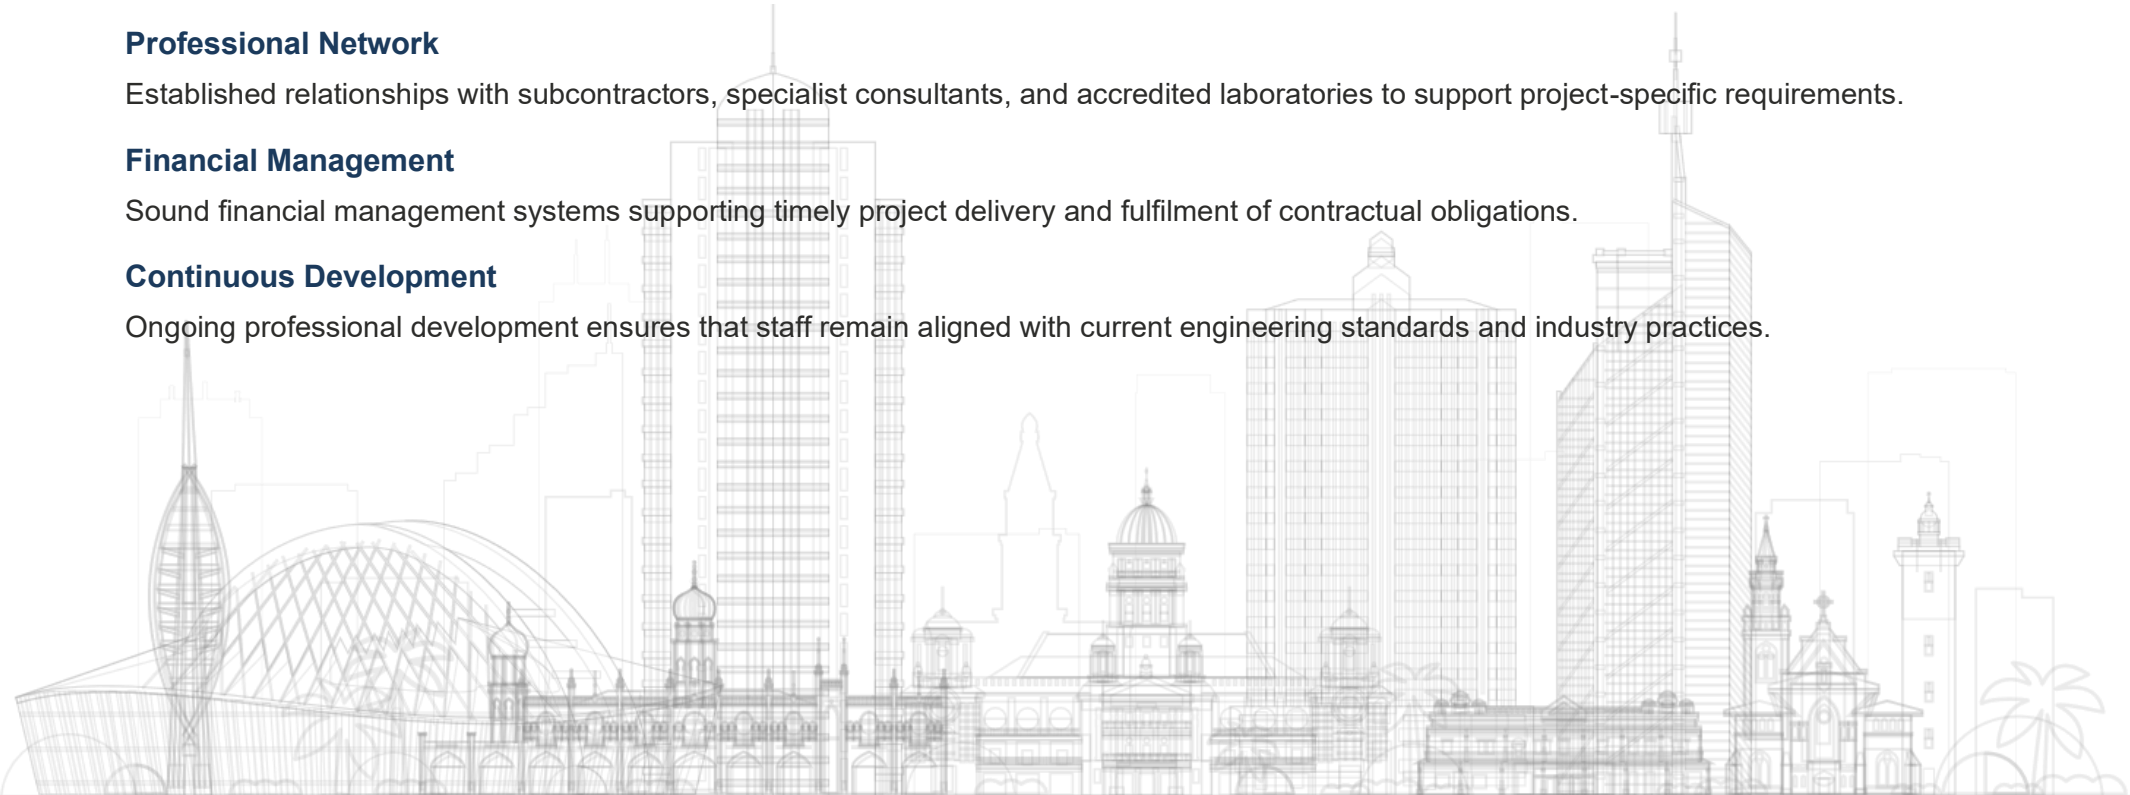

Established relationships with subcontractors, specialist consultants, and accredited laboratories to support project-specific requirements.

Financial Management

Sound financial management systems supporting timely project delivery and fulfilment of contractual obligations.

Continuous Development

Ongoing professional development ensures that staff remain aligned with current engineering standards and industry practices.
